Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS ● "There are too many loan applications pending, I can't process them all on time." ● "I need the applicant's complete documents before I can make any decision." ● "Every applicant's case is different, it's hard to be consistent with approvals."	THINKS ● "What if I approve a risky applicant and the bank faces losses?" ● "There must be a faster and more reliable way to assess loan eligibility." ● "Am I being fair to all applicants or is my personal bias affecting decisions?"
PERSONA NAME Rajesh Kumar from Urban <i>(Bank Loan Officer / Credit Analyst)</i>	
DOES ● Manually verifies income proofs, credit reports, and employment documents for each applicant. ● Cross-checks multiple spreadsheets and past records to assess creditworthiness. ● Spends hours on repetitive data entry and document sorting instead of analysis.	FEELS ● Overwhelmed by the high volume of pending loan applications every day. ● Anxious about making wrong approval decisions that could lead to loan defaults. ● Frustrated with the slow, outdated manual process that lacks data-driven insights.
