

Project Demo Planning

Date	05 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Purpose	Introduce the presenter, state the project name (Smart Lender), and explain the goal of real-time loan eligibility prediction.	0.5 mins	Presenter
2	Dataset Overview	Show the raw <code>loan_prediction.csv</code> file, explaining key features (income, credit history, loan term) and labels.	0.5 mins	Presenter
3	Source Code & ML Pipeline	Walkthrough of VS Code files: <code>models.py</code> database schema, <code>train_models.py</code> SMOTE/preprocessing, and <code>tune_xgb.py</code> XGBoost tuning.	1.25 min	Presenter
4	Web App Dashboard Tour	Open the live application on PythonAnywhere and explore the analytics dashboard tab panels (Univariate, Bivariate, and Swarm plots).	1 mins	Presenter
5	Live Inference Demonstration	Complete the multi-step form wizard with sample values, submit for prediction, display output status, and verify in the history log.	1.0 min	Presenter

6	Tech Stack & Conclusion	Summarize the Python/Flask/SQL/XGBoost stack, and explain how this classification pattern relates to other predictive tasks.	1 mins	Presenter
---	-------------------------	--	--------	-----------

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain target financial institutions and address the manual credit risk assessment bottleneck.
2	Solution Overview	Detail the dual-feature approach: historical EDA visualizations combined with a tuned XGBoost predictive model.
3	Live Feature Demonstration	Walk through the multi-step form wizard, display the glassmorphism result card, and confirm SQLite data insertion.
4	Q&A Session	Prepare to answer questions regarding classifier comparisons, SMOTE balance ratios, and PythonAnywhere cloud hosting.
